

## SCUPPER 48

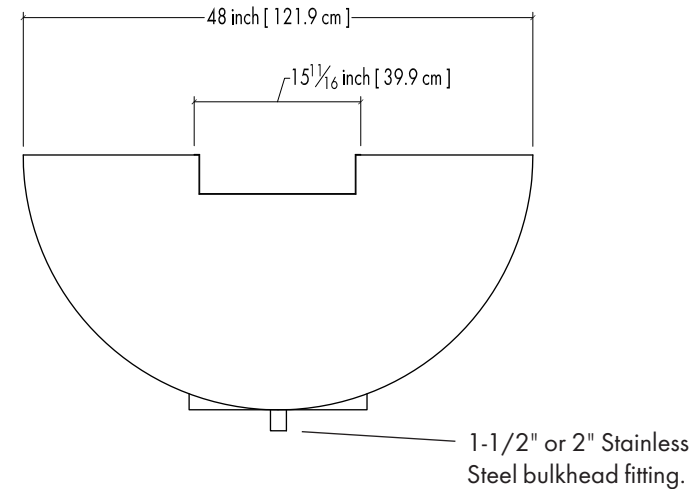

This large water feature is sold as a vessel only and requires an external pond, pool or catch basin. Due to all the various set-ups, we consider this a "custom" product. If needed we can work with your technicians to modify as required.

The brass and copper will oxidize naturally unless coated. If you wish the metal to retain it's "new" finish you can specify coated.

### Contents:

- Solus concrete bowl.
- Metal scupper in choice of Stainless Steel or Brass or Copper.
- Optional coating on Brass or Copper.
- 1-1/2" or 2" Stainless Steel bulkhead.
